

DAILY EVENING BULLETIN.

THURSDAY EVENING, DEC. 29, 1881.

THE State of Georgia has in successful operation fifty-five cotton mills and others are preparing to start. A number of these mills are the largest and most expensive to be found in the South, and they are all paying large profits to their owners. In North Carolina there are fifty-three cotton mills in operation and six others are in progress and nearly completed. In the latter State there are also four or five large woolen mills which have paid large dividends ever since their establishment. The Southern manufacturers are now competing successfully with the oldest and best factories of the Northern States.

Says the New York Sun: There is a disturbance about the manner in which Speaker Keifer has made up the committees of the House of Representatives. Personal meanness appears to be one of the motives governing him in the selection and partisan meanness another. He leaves off conspicuous Republicans because they do not suit him, and he leaves off deserving Democrats because they might interfere with schemes of jobbery which are to be promoted at this session.

As far as possible, these committees seem to be organized by the Speaker first of all in the interest of corruption; and there is reason for the opinion that Secor Robeson has really had more to do with making them up than Keifer himself.

However, all those who are left out may remember that if they are not employed in the committee rooms, they can devote their time to careful preparation for the most important work to be done on the floor of the House and such men as Mr. Whithorne, Mr. Hewitt and Mr. Holman are sure to make themselves felt in the debates and the votes of the House, however ardently the corruptionists and jobbers may desire to suppress them.

But why is it thought of such vital importance to belong to one or another of these committees? And why is it that the managers of big corporations, like the Pacific railroads, for instance, know beforehand the names of those who are to serve on committees affecting their interests, when they are still kept a secret from the members of the House?

Now that the question of female suffrage is to some extent occupying public attention, the subjoined article which we find in an exchange will be read with interest. It appears from this that nearly a century ago when women voted in New Jersey they knew as much of "repeating" and "ballot-box stuffing," as the most experienced election manipulators of the present day. The article is offered as a hard nut for the women suffragists to crack. It is entitled "Female Suffrage in the Olden Times," and is as follows: "It is somewhat singular that the advocates of female suffrage have not given greater prominence to the fact that women voted in New Jersey under the constitution adopted in 1776, and continued to exercise the elective franchise until deprived of it by the legislature in 1807. In consequence of frauds practiced at an election upon the question of locating a bridge across Newark bay, an act was passed limiting the suffrage to free white males, twenty-one years of age and worth \$50. In the contest over the Elizabethtown bridge women were charged with changing their dresses and voting twice. By such devices as these the vote of Essex county, which, prior to that time had never exceeded 4,500, was run up to 12,857. The legislature set aside the election and put a statutory construction upon the article of the constitution relating to suffrage, which reduced the voting population nearly one-half. It does not appear that the disfranchised women ever contested the constitutionality of the act."

The entire business part of the town of Durand, Wis., burned on the 27th inst. The origin of the fire is not known, but it is believed to be the work of the friends of Ed. Maxwell who was lynched there a short time ago. The bitter feeling against the lynchers has been working itself up for some time, and it is believed this is the revenge of the dead man's friends.

Major W. J. Davis and Captain J. R. Briggs, of Louisville, contribute definite information regarding the confederate treasure. They say \$107,000 of the amount was distributed among General Breckinridge's command and that they saw it done. All the bullion on hand was changed with Richmond bankers and the above sum realized. This thoroughly disposes of the charges against ex-President Davis.
